A Offline authoring
the language model proposes, one author curates
generic tool
domain pack
Simulation code
run through an adapter
Reference books
and author documents
Historical accounts
licence recorded per chunk
Simulation base
capabilities and limits;
events, difficulty
L1 evidence rule
or simulation gap
Concepts base
terms, prerequisites,
evidence rules
L2 mapping
(interpretation)
History base
practices with
evidence passages
L3
scenario
verdict
Missing and
contradictory
gaps, conflicts, anachronisms
Situations
practice + concepts +
feasible scenario;
simplifications recorded
Game evaluation report
issue drafts for the game's developers
Questions
review sheet per source for the historian; author
Activity proposals
compared blind with the game's existing activities
Narrative pipeline
author sets cast, arcs and beats (story first)
retrieve → generate → verify claims (evidence IDs)
fictional content marked → author review
Reviewed line bank
PT / EN; trigger, delivery, conditions, sources
B Runtime in the game
deterministic, no language model
shared folder in the game (versioned contract)
Simulation
boat state each frame
Observer
game moments + difficulty 0–1
Scheduler
cues during difficulty;
stories in calm windows
Captions, optional speech
curiosities in an end-of-mission logbook
